What We Do

Since 1947, members of Lions Australia have worked tirelessly to support and empower our communities. Community service is both powerful, and personal, and the aim of Lions Australia is to provide our Clubs and members with the tools and resources necessary to improve the lives of all Australians. We do this through supporting major medical research projects and health initiatives such as the development of the cochlear implant and cervical cancer vaccine. We provide funds and personnel to assist with emergency response when disasters like cyclones, floods or bushfires hit. We work to provide young Australians with meaningful opportunities to learn, to seek new challenges, and to thrive. We work with our communities to enable projects that save and enhance the environment. And we strive to ensure that no Australian family or individual is left behind due to disadvantage. We believe in making a difference, and we do this by giving people the opportunity to contribute to the causes that matter to them as individuals and in their community, and by working together on larger challenges that face us all.
